SUN PRINCE QUARTZ HALOGEN INFRA RED HEATERS

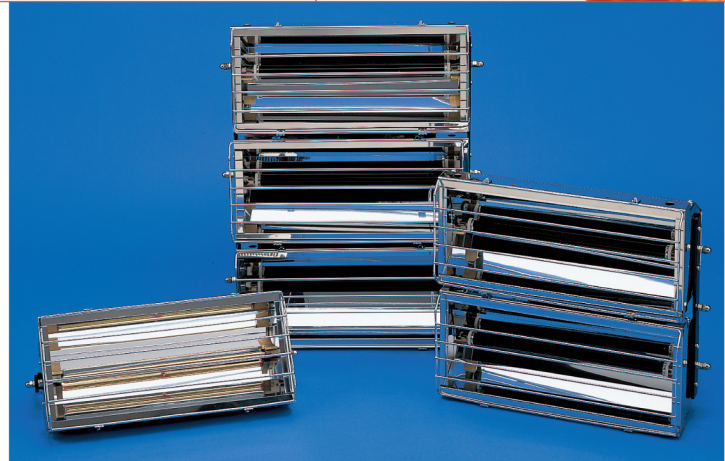

Hyco Sun Prince Infra Red heaters utilise quartz halogen lamps that operate at a very high temperature, converting almost all the electrical energy into short wavelength infra red radiation. They are therefore ideal for heating applications in draughty or tall buildings such as garages, warehouses, factories and similar difficult-to-heat situations where convection heating would be impractical.

The Sun Prince is supplied complete with the lamps, chrome plated guards, stainless steel chassis and wall mounting bracket. Sun Prince heaters are silent, generate no fumes or condensation and switch on or off almost instantly.

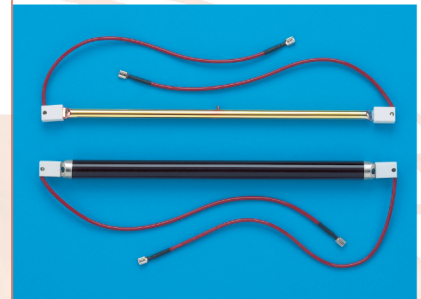

The Sun Prince features ruby or gold low glare lamps depending on the model purchased. The 1.0kW, 2kW, 4kW and 6kW models feature gold lamps as standard. The 1.5kW, 3kW and 4.5kW models feature ruby lamps as standard but are available with gold lamps at an additional cost.

Lamps are made from high temperature resistant quartz glass that must not be handled with bare hands. Lamps last an average of 7,000 hours and are excluded from the guarantee.

Heaters may be mounted from the ceiling but must be angled at least 25 degrees from the horizontal to avoid over heating. Allow approximately 100-200W of heating load per square metre.

Sun Prince

L1500CG and L1500C

TECHNICAL DATA

CODE	MODEL	KW	DIMENSIONS	STANDARD LAMPS
SP1000E	Sun Prince 1000	1.0	170 x 370 x 140	Gold
SP1500E	Sun Prince 1500	1.5	170 x 370 x 140	Ruby
SP2000E	Sun Prince 2000	2.0	170 x 370 x 140	Gold
SP3000E	Sun Prince 3000	3.0	350 x 370 x 140	Ruby
SP4000E	Sun Prince 4000	4.0	350 x 370 x 140	Gold
SP4500E	Sun Prince 4500	4.5	530 x 370 x 140	Ruby
SP6000E	Sun Prince 6000	6.0	530 x 370 x 140	Gold
L1500C	Ruby Lamp 1.5kW	1.5	358mm *	
L1000CG	Gold Lamp 1.0kW	1.0	358mm *	
L1500CG	Gold Lamp 1.5kW	1.5	358mm *	
L2000CG	Gold Lamp 2.0kW	2.0	358mm *	

**leads 440mm long with fast-on push fit terminations
Add suffix/G for gold low glare lamps*
